THE WINNERS AND LOSERS OF CENSORSHIP...

I caught the replay of the Senate Hearings on video game violence last night on C-SPAN. Even though it kept me up to three in the morning, I found this brief peek at how many groups view video game play to be most enlightening. While the majority of the speakers, including congressmen Kohl and Lieberman, managed to use the very descriptive forms of violence found exclusively in Night Trap and Mortal Kombat to lobby that all games should be judged the same.

While Nintendo put its best marketing muscle forward to describe the virtues of their approval process which, they claim, eliminates overt levels of violence in Super NES titles (except, of course, the 20,000 deaths that take place in a typical game of Smash TV) it wasn't until Sega representative Bill White explained, in essence, that any form of media, if taken out of context, could be make the whole medium look bad - whether it's video games, television, music or movies.

While you have to applaud both sides for their individual stance on the issue of video game violence, and I personally agree that high levels of violence can't contribute positively to very young minds in any way, it shouldn't be the responsibility of government to form committees and spend money to tell game players what is and isn't permissable. Do the death sequences employed by Mortal Kombat have a stronger impact that the thousands of deaths that take place in Smash TV? Does that mean that video game terminations are permissable if conducted in low-res? If you're at the controls of a flight simulator and you go for a soda, subsequently causing the deaths of all 240 passengers on-board, will the government say that game should be played only by adults? Come to think of it, should Nintendo recall Super Mario World because it promotes the incineration of turtles? If PETA only knew.

I realize that I'm arguing a point to absurdity and that for most of us the questions surrounding video game violence are not quite this exaggerated. Night Trap shouldn't be viewed by younger players (even though they'd probably think it was cool), but that's why Sega put a rating on the front. Others will argue that the ratings do little to keep youngsters from playing the game, but since Night Trap, Mortal Kombat and most other titles cost slightly more than what your average 10 year-old has in pocket change, the purchasers of these products should exercise more caution when buying them. We can argue the definition of violence as it applies to video games, but at least Sega took the initiative to at least provide some information to parents and others making these purchases.

And it's with the companies that this issue should be debated, not in Senate chambers with congressmen who's only knowledge of the subject is gathered by their aides. For although the video game industry was given an opportunity to speak, the decisions related to video game violence and the government's role in the subject were made in Mr. Kohi's and Mr. Lieberman's minds way before C-SPAN got there.

LETTER OF THE MONTH

WHAT'S THE DIFFERENCE?

I really love your coverage of all the latest game systems. I own a Sega CD. Duo, Super NES, NES, Neo•Geo and plan on getting a 3DO and a Jaquar sometime down the road. You have mentioned in the past the differences between the Japanese Mega Drive and our Genesis, the Super Famicom versus our Super NES, and the PC Engine verses our Duo. But what about the differences between these new systems. like the difference between the Panasonic 3DO and the Sanvo model? Have any other systems been changed between the U.S. and Japanese versions? This kind of information really fascinates me.

Jeff Bradshaw Roanoke, VA

(Ed. It sure sounds like you plan on spending some serious cash in the future! OK, here we go. Yes, Sanyo is developing their own version of the 3DO. Aside from obvious extenor differences of the machine and controller, the Sanyo model is directly compatible with the already released Panasonic system. There's some surpnsing news, however. It seems that the Japanese are losing faith in the future of the 3DO

as Sanvo has dropped all plans of releasing this system. This offers a clue to other developers, such as AT&T (who are also planning on backing out as well), that the future of the 3DO may not reach the high hopes everyone expected. As for the other systems. there are changes from country to country. Everyone already knows about the Sega CD and Mega CD incompatibility difference, so we won't dwell on that. The Game Gear and GameBoy haven't been modified so games made for the Japanese systems can be played on the American systems and vice-versa. As for any changes in upcoming systems, we'll let you know as soon as we know.)

All plans for producing the Sanyo 3DO player have been canned in Japan.

LASERACTIVE OWNER SPEAKS

This letter is in response to James Vincent's letter in the December issue of EGM. I wish to clarify some of the LaserActive bashing taking place. I own the system and have for a month or so, I feel I have the authority to speak about it for this very reason.

The CLD-A100 LaserActive system is not a gaming-only platform. About 50 percent of the games out at this time are guizzes, history lessons or interactive movies. This system uses a Laser Disc player as its main unit. What parent wants to buy a system for their kid if they can't comprehend the technology? I applaud Pioneer for this system! I favor its price which keeps away the rugrat, snottynosed, spoiled kids. After all, if a parent bought this system for a kid, it would be broken within a week and would have Cheez-Wiz all over it! You cannot argue without knowledge. Before any of you do. look at the big picture. LaserActive is interactive entertainment. This is not an 8. 16. 32 or 64-Bit system and I hope it stops being classified as one.

Derek Bullard Lake Forest, CA

(Ed. Knowledge, eh? For your information. Derek, the LaserActive should be classified as an 8- or 16-Bit system because you need one of these inferior modules to play the LaserActive games, but I guess you already know that, right? You mention that you favor the price to keep it away from younger gamers. While it may be true that the price will keep these "snotty-nosed" players from buying the system, you have to remember that younger gamers are the bulk of the electronic gaming market. Anyway, the price is still out of the league of the average gamer. Those who want exclusivity with game systems must pay the price and are usually rewarded as such.)

NEW LIFE FOR CD-i

I'm glad to see that you guys are starting to cover the CD-i and its games. I don't have this system, but I am thinking about purchasing one. I would like to know a few things about it before going out and buying one. First, what kind of processing power does it have? Second, I've seen CD-i players by Philips and Magnavox. Do any other companies make them and which of these companies offer the best deal for their CD-i system? Finally, I've noticed that many of the CD-i games I am interested in require the MPEG upgrade card to play them. How much does this upgrade cost?

Chris Koshgarian Hampton, VA

Games like Space Ace offer incredible quality with the upgrade cartridge.

(Ed. We're happy to see the CD-i really peak as well. Although this system started life as an educational tool, there are some really good games coming out. The Philips CD-i has two 16-Bit processors for quick number crunching. Magnavox and Philips offer CD-i players that are compatible with each other so there's no need to worry there. As for the best deal, simply shop around to see which store is wheeling and dealing. The upgrade card, which offers full motion video capability is what makes the CD-i the gem that it is. Although it costs about \$250.00, the games that utilize this card are well worth the cost, like Space Ace, Mad Dog McCree and Caesar's Boxing. Be sure to turn to page 128 for our four page Special Feature all about the Philips CD-i and all the new games we'll be seeing in the coming months. The CD-i is offering serious competition to the Panasonic 3DO. The system price has been seen for \$399.99, and although the upgrade cart boosts the price, it's still a great deal.)

LETTER OF THE MONTH

If you think you have what it takes to contribute to society, go write to Newsweek. If, however, you have a thought or opinion that fellow gamers would particularly find crazy, we'd love to immortalize you with a special edition EGM T-shirt proclaiming your fondness of and psychosis to video games!

I think Sega has gone too far. First they announce a rating system as an excuse to bring out a few super violent games like Mortal Kombat and Lethal Enforcers. Then they tried to really prove how much they are for violence. Don't get me wrong, I wish Super Nintendo was a little more liberal. But to purposely pop your Sonic balloon on Thanksgiving Day during the parade? No matter what people say, I know they meant to hospitalize and injure people. They were probably disappointed that they only got a small girl and a woman. It

woman. It is time to take some action. What do you think?

We think you ate too much turkey while watching the Macy's parade. Anyway, cornards go out to Michael Page of Connell, WA, for his twisted interpretation of the Thanksgiving Parade. Maybe you should cut back on the stuffing, too.

BUYER'S GUIDE RESPONSE

Every year, I look forward to one thing: your Video Game Buver's Guide. I really enjoy the systems reviews because it's great to hear how the competition like the 3DO and the Jaguar stand up to the Super NES and Genesis! Of course, nothing could top the Best and Worst awards. They're an absolute riot! Since I have every back issue, it doesn't really help me to see all those Fact Files again, but they do add to the magazine's quality. So what's new for 1995? Are there going to be new categories for the Best and Worst awards? There was one small problem though, the picture you ran of the cover in EGM 53 looks different than mine. My cover had a gold logo while yours showed a sparkly silver one. Is this a defect? If so, how can I get the right one?

> Jack Falcors Somerset, PA

(Ed. It's really great to hear that kind of response to the Buyer's Guide, they are fun issues to do and consumer response is great. Naturally there will be more categories to add to the fun. The cover you have is not a defect, but is the one that

goes out to consumers. The silver glitter cover was made exclusively to hand out to advertisers and companies. The print run of these issues was extremely low with no chance for a reprint. There are no more copies lying around the office so save your checks—we just don't have any to sell!)

IT'S A BOY!

Congratulations to Rebecca and Steve on the arrival of their son, J. Dylan Harris, born Dec. 13. From all the staff of EGM, we wish them the best of luck!

SAVE MY GAME

Role-playing games are a blast! I've purchased almost every one on the market for the Super NES and Genesis. The Secret of Mana is a great title and I also picked up Enix's Paladin's Quest a few days ago. I noticed something drastically different between my copy and yours. You guys stated that Paladin's Quest was not allowed to save games in your Good, Bad, Ugly box on the page. However, my version can save the game as I play it. I don't know what was wrong with yours, but it works just fine for me. The game is great and really does have some funny moments. I just wanted to clear up this little mess up.

Jack Boomis Campbell, OH

No need to fear, Enix's Paladin's Quest can save games with the battery backup.

(Ed. Yes, it's true that the final copies of Paladin's Quest can save your progress in the game. The early E-PROM we received could not save games, a problem that is usually corrected on finished versions of games we receive. Perhaps the sentence could have been worded differently, but we didn't mean for it to sound like you couldn't save the game. Sorry for the confusion.)

A new feature to EGM is the official Bad Photocopy Contest. You'll find this contest in every Interface issue. What we did was photocopy a part of the magazine, blow it up, oh, 800% and now it's up to you to find it somewhere in the magazine. You don't win anything, but you can congratulate yourself if you find it!

Here it is! Attempt to find this picture in the magazine, if you can!

IN NEED OF OLD GAMES

Do you know of any mail-order companies out there who still deal with some of the old classics for such systems as Atari and Colecovision? I have been searching everywhere and have written to every other magazine on the continent with absolutely no response whatsoever. You are simply my last hope. I realize these games are outdated and old, but I still enjoy the classics every once in a while just for the heck of it.

Paul Graber Ocala, FL

Finding old games like Pole Position II may be easier than you think!

(Ed. Old games, eh? Well, flipping through the pages of our magazine doesn't reveal any mail-order companies specializing in older games, so the only suggestion we can offer to you is to look through your local newspapers and check out the classified ads of people selling off their old games and systems. You can frequently stumble across families selling their old Atari systems, Intellivisions, ColecoVisions, Odysseys, and even ADAM Computers. All these ads even mention games for sale for incredibly cheap prices. You'd be surprised at the kind of deals you'll find! If newspapers don't offer much luck, stop by a video game trade show in your area. Maybe you won't get the cheapest price possible, but hey, many people will do anything to get their hands on these nostalgic systems and games. Happy hunting!)

THE RISING SUN RESPONDS

As a loval reader of your mag in the Land of the Rising Sun, I would like you to explain a few things to us readers in Japan, First, why is there no Mortal Kombat in Japan? I have played games like NBA Jam and X-Men here (You can always tell an American arcade game because you have to stand up to play it), but what sounds like the best game in the States is nowhere to be found. Also, why does it seem that Ranma 1/2 has a fair number of fans but not Dragon Ball Z? I'll bet Sushi-X would agree that comics and animation of the long-running saiva-iin saga would do well in America and would also give the necessary background to show just how cool the Dragon Ball

Here's a panoramic view of holiday set-up. Impressive, eh?

games are. Also, why does the PC Engine and Super CD-ROM kick butt in Japan, but the Duo almost never gets mentioned? Lastly, fellow vidiots and I have been using Hudson "Honeybee" adaptors to play Genesis games on the Mega Drive for about three years now, but when I put in Shining Force, nothing happened. Is there a new security chip in U.S. games and if I ordered Mortal Kombat, will it work on my Mega Drive using the Honeybee?

Stu Fonda Aichi, Japan

The popularity of Ranma 1/2 can be attributed to the successful comic series.

(Ed. Whadaya mean there's no Mortal Kombat in Japan? In Ed's many trips to Japan, he has seen plenty of arcades with Mortal Kombat in them. Most machines do not have the blood and gore turned on as part of an effort to clean up the arcade scene, but ves, he's seen Mortal Kombat machines in Japan. Take a look around town, heck, there's practically an arcade on every corner anyway! Ranma 1/2 has really taken off in the States due mostly to what Viz Comics has done. By releasing a comic book series of Ranma 1/2 along with both dubbed and subtitled versions of the anime series, more and more Americans are being introduced to Japanese animation, and loving it! DTMC also did their part by releasing Ranma 1/2: Hard Battle, (Ranma 1/2 Part 2: Hard Battle to you) here in the States. It's a fun game that nearly every fan of the anime and comic series should definitely check out. Dragon Ball Z isn't as popular for just these reasons. No one has released a successful comic book series and Bandai seems reluctant to release the incredible Super Famicom version (Dragon Ball Z 2 looks even better!) for play here in the States, How unfortunate, The PC Engine is kicking butt in Japan because there is a steady flow of good games, especially with the upcoming Arcade Card, while the Duo suffers from a low quantity of titles. whether good or bad. As to Shining Force, no, it does not work on Mega Drives and unfortunately for you, Mortal Kombat will not work on a Mega Drive either. All you'll see is a black screen.)

POSTCARD

The next time your parents drag you to some lame roadside attraction, be sure to pick up some of the tacklest postcards and send 'em in.

To take the sting out of springing real money for an ugly postcard, Sega has volunteered to give the winners one of their new six-button controllers and a Game Gear Carry-All case! Keep your eyes open as ugly can now pay off!

This month's winners are some real dogs. If you think you've got what it takes to top these winners, then break a pen and send your postcards addressed to Interface: Letters to the Editor.

I WANT MY MK2!

After flipping through the January issue of EGM, I nearly fell flat on my back when I saw all the cool moves for Mortal Kombat 2! I've played the game for a while and managed to figure out a few moves on my own, but that issue really helped me out. But there were some problems, though, Some of the characters' moves didn't work when I tried them out, especially the fatalities. I know there was a little sentence at the bottom of the special that said the moves were performed on a preliminary version of MK2, but when can we expect to see these tricks work on a final version? The game is an absolute riot and the blood is really intense! I know I can count on you guys to keep us updated. Keep up the great work!

Tom Alestar Watertown, NY

Having trouble with the moves in MK2? Don't worry, the final machines are here!

(Ed. We realized the potential problem of these moves not working on every machine, that's why the disclaimer was put there. You see, Mortal Kombat 2 went through many changes before it was actually put into final production. The moves and fatalities that are listed, like Jax's Ground Slam and Mileena's Sai Shot. may or not be in Version 2.0, which is the final setup. It seems that Ed Boon and John Tobias, the creators of MK1 and 2, wanted the game to be challenging, with all the different fatalities to be complex, yet very rewarding for those who managed to get them to work. It would definitely get players to keep trying their hardest! The version you were playing was probably one of the early prototypes that had frequent changes to it, or was simply a testing mule to see consumer response. Many arcades still have these machines and will probably be updated in the coming months. It was no surprise that Mortal Kombat 2 is a real hit. So fret not. Version 2.0 should be trickling into arcades everywhere by the time you read this and if you find any tips or secret moves that we never printed, be sure to send 'em in! And be sure to watch for more arcade coverage in the coming months!)

TO SIMMAN

This no-brainer basketpall game is the most fun I've had in a long time. It's easy to pick up and play, plus there's los echnique to master. The graphics and sounds are supert. When you play with four players its unbeatable. The spectacular jams and slamdunks make it even more than worthwhile. This as close to a 10 as it can get for a sports game. Even if you don't like sports, you'll love this b--ball game

DINNON CARPENMER

It's basketball with an attitude! NBA Jam absolutely rocks in the 'fun' department! No other game I've played there me kind of fun for sports game haters like me. The game play is flawless with graphics and sounds straight from the arcade. The game is played bes with feur players since the companies and be a really rough opponent. If it's one thing I can't stand though, it's those wretched goal tending penalties

AL MANUEL

Excuse the pun, but this game iams! This is one of the few sports titles I actually like and I can't stop pleying to it takes a lot for me to ke a sports game and Acclaim has produced one of the most addice sports litles I have ever played. The awesome slams and virtual no-four ules are a total laugh The lact that you can have your own personal record is cool, too Again, excuse the pun, but this game jams!

SUSHIEK

This game actually got me out of the arcades. Normally I just don't get into sports titles, but this game is a laws time most enjoyable part of the no brain slams and jams. Even if you don't know how to play the game, you'll be doing all kinds of jams and blocks in no time. The gradues are tops and the sources and speech really accent this great cart. Whether you're a ninja or armchair sports pro, you'll love to jam!

This couldn't wait 'til the 21st century.

The "X" generation of Mega Man adventures is here. For the first time on the Super NES.

As his last great creation, Dr. Light developed "X"—the first thinking, decision-making robot. Years later, Dr. Cain modifies his design to make thousands of supposedly "harmless" Reploids. That is until Sigma, the most intelligent Reploid of all, decides to lead the others in eliminating all humans from the planet. Now "X" must hunt down Sigma using his all-new arsenal, including

the X-Buster and the awesome Emergency Acceleration System. It's the Mega battle of the next century, found only on the Super NES.

"X" uses his X-Buster to save Zero, the leader of the Maverick Hunters from the evil Vile.

When the robotic amoeba glues "X" to the ground, either he shoots or he's stuck

"X destroys an enemy submarine fuel tank and things get extremely explosive.

OUARTERMANN'S

Q-LETTER

GOSSIP FOR EGM SUBSCRIBERS ONLY!

Welcome back kiddies, to the new and improved Q-Letter for 1994! This is the one place to be for the inside scoop on what's happening inside and out the world of video games! We've got a bunch of the good stuff this month, including info on new hardware as well as a quick round-up on software in the only column that Congress deemed too saucy without a rating...Taking top billing this month in the gossip department is news that Sony's new game machine, code-named the PS-X, is rumored to have Ridge Racer as its pack-in! Sources close to the project tell the Q-Mann that it's a perfect translation and that other hot Namco coin-ops, including Galaxian 3, Solovolu, and Cyber Sled will also be programmed for the new system. Rumor has it that the Namco's so impressed with Sony's new dream machine that they are retooling their coin-op development exclusively around the hardware in much the same way SNK has turned their home unit into an arcade smash...l just love doughnuts and nougat...Speaking of

SNK, Quartermann has learned that SNK will finally take the plunge and put their advanced CD-ROM upgrade for the Neo-Geo on store shelves in Japan this April. It will have a 32-Bit upgrade, but will be used only in the consumer version of the hardware. Terry Aki, the Q's main man on the streets of Tokyo, tells yours truly that a U.S. release won't be far behind...Other new games from SNK include Samurai Shodown 2 in March, World Heroes 2 Jet (a faster version of the original), and the Survivor, a game that will probably have a name change but still deliver the ultimate fighting game. This 200 Meg beast will combine characters from all of SNK's previous fighting games for the final face-off...Hot rumor from the Sega front is that the company is putting their mascot, Sonic, out to pasture - at least sort of. White shirts from the vid game leader are saying that the release of Sonic 3 puts the finishing touches on the trilogy and that future releases will contain a different type of play mechanics altogether...In the face of new pressure from the Beavis and Butt-Head brigade on Capitol Hill, 3DO has backed off of its previous line of letting the market dictate the content of their games. More intense titles will now carry a "For Mature Audiences" sticker. Can't take the heat, eh boys...Look for other companies to become equally concerned about games with adult themes. Philips, the maker of the Joy of Sex and Playboy's Art of Sensual Massage, has built in a lock-out code into these games. The only way that younger folk can get them booted up is by plugging in the 4-digit code that M and P program in...

...More news from Sega...Besides the not so secret Saturn system, the word on the street is that Sega will be showing a portable Sega CD. Wowwwie! The wired-up version wasn't that great to begin with so how about forgetting about it and just skipping to the chase and getting the Saturn out in '94? The Philips portable CD game machine runs circles around the Sega CD anyway, so just give us the good stuff Sega...Look for plenty of new software to hit store shelves in the coming months. The Q-Mann has been undercover for the past few weeks at game developers around the country and managed to get the inside dirt on a number of titles that are sure to score some heat later in the year...Look for White Men Can't Jump from Trimark to try to go head to head with NBA Jam (tough call, since NBA is probably the best sports game ever created for the home market) as well as Evolver, which is based on an upcoming Trimark movie starring Brad Furlong from Terminator 2...On the 3DO front, Crystal Dynamics has their sights set on new 3DO fortunes with Star Control 2. Updated from the original Accolade release, this new version promises to have plenty of the full-motion and rendered graphics found in their earlier efforts...Also for the 3DO is Alone in the Dark by Interplay. Look for more companies to try their hand at the "interactive movie" concept as the full-motion platforms become more widely available...Interplay is also broadening their presence on other systems with Battle Chess for the Atari Jaguar. Other Jaguar games over the horizon include Race Driving and an updated rev of Pit Fighter...Finally, Enix is putting an end to the wait for two great sequels, including Actraiser 3 and Soul Blazer 2...TH*Q has grabbed the rights to WildC.A.T.s from Jim Lee (with Sculptured doing the design work), while Solid Soft-ware, the folks responsible for Bubsy, have a new action game under development called Morf...

...That wraps it up for this installment of the Quartermann section! Look for more info on upcoming games and gossip in the new issue of EGM, and tune in next month for a special announcement on the ultimate summer sequel...

- QUARTERMANN

QUARTERMANN'S TOP TEN REASONS WHY CONGRESSMEN DON'T WANT VIOLENT VIDEO GAMES...

The Q-Mann was in the inner chambers of Congress, peeking around a flower pot at the proceedings that Washington claimed would change the face of industry forever. While the blg guns of gaming strapped on their bullet-proof vests, and fired first with an answer to the Washington white shirt's Q's, yours truly found out the real reasons behind the brohaha...

- Cong. Kohl was upset after not being able to find his copy of Madonna's SEX.
- Lieberman couldn't find Night Trap for his grandson, so he wants it banned.
- Both congressmen were jealous that they couldn't package their BS as well as Konami boxed Lethel Enforcer.
- The government really wants to force all games to also be made specifically for girls - of course Ranma 1/2 would be exempt.
- Kohl just hates to see game characters sweat.
- Someone has to run on the anti-violence ticket in '94.
 Of course real violence shouldn't be the issue.
- 4. Insect Politics.
- Complaining about cartoon violence was getting old.
- Congress felt this was the only way to create a level playing field - something Nintendo's marketing hasn't been able to do.
- Hey, what better way to get on C-SPAN?

MEGA MAN X

THE Q-MANN GETS HIS HANDS ON THE SEQUEL THAT HE'S BEEN LOOKING To play for years! Mega Man goes 16-bit, with great results!

...The Q-Mann has always been a big fan of action games from the Mega Man mold, and this latest installment of the popular character lives up to my expectation! The game retains the same concepts that populated earlier efforts, including the process of defeating bad guy bosses and stealing away their special powers when they're knocked out. The graphics are definitely a step above anything that had been presented in the past on the 8-Bitters, and many of the special effects contained in this animation-heavy adventure are really mind-blowing! Although the game suffers the same lack of challenge that's plagued earlier chapters of the Mega Man saga, it's still a fun ride, even if it goes by a little too quickly for me...

Q-MANN RATING:

O

CAPCOM'S ALADDIN

ALTHOUGH IT DOESN'T HAVE QUITE THE GLITZ OF TWE SEGA VERSION,
CAPCOM'S CONTRIBUTION TO THE SUPER ANIMATION GAMES IS WORTHY...

...Although the graphics and animation don't surpass the truly brilliant visuals found in the Sega version of Aladdin, this cart holds up well anyway. The action is fairly straightforward, and broken into a succeeding number of scrolling action scenes. Most of the game involves timing jumps and other moves and there's really very little in the way of one-on-one fighting. It's still a great game, with lots to look at and plenty to do...

Q-MANN RATING:

8

...Look for a special insiders tour of the 1994 CES in the next Q-Letter, as well as the name of the lucky winner to the MK2 contest conducted by yours truly! 'Till next time, don't play with limp joysticks...

MAJOR MIKE'S GAME ROUNDUP

X-Kaliber 2097

Activision / Super NES

This is an average side-scrolling hack and slash your way through the levels. Plenty of enemies to get rid of, yet the entire thing is boring and rather routine. The control isn't the best either, but fans of this type may like it.

Charlifter III **Extreme / Super NES**

Yes, Choplifter, the timeless game, finally makes it to the Super NES, and it is a winner. Fans of military simulators will definitely feel at home with this one. The levels are huge, but there could be more of them.

We're Backl

Hi Tech Exp. / Super NES Back from where? And... why? The little ones may enjoy this cutesy game where you get to control dinosaurs, but even they may get very frustrated with the less-than, responsive controls However, the graphics are good.

The Peace Keepers Jaleco / Super NES

This is a very long and very good fighting game like Brawl Brothers! Huge levels and non-linear game play make this one quite a trip! The four-on-four free-for-all is a nice option, but doesn't come off that well. Algood action/fighter.

NHL Stanley Cup Nintendo / Super NES

This game is Mode 7 galore, but somewhere in there the game gets completely lost. Fans of sports will be much better off with something else. This one just doesn't hack it and why is there a selection for French dialogue?

Super NES Sunsoft Rabbit Rampage

Action Release: Now Levels: 10 12 Mea

This cart has all the right ingredients - great graphics, one of the pest licenses in the world and lots of move to lugs Bunny. Although some of the game play can get fustrating at times, once you learn the play mechanics, the game becomes or of the best a time. The and some of scrolling & second the comical animations are outrageously funny. Don't miss this excellent cart!

While the game can be a bit frustrating to play at first, Rabbit Rampage becomes very enjoyable once the numb. The graphics are very cartoonlike and ado to the atmosphere of the Bugs Buyer theme. There's loads of team que with lots of hidden rouse to discover. If you're a Bunny fan, this game is a lot of fun. But be prepared for some frustrating game play until you master it.

This Looney Tunes cart has some decent graphics, as well as some of the cool sounds from the cartoon real bad part about the game is its poor game play. Buck Bunny's high kick can be a very weeless a lack. At times you have to get very close to an enemy to see him but before you do, you're was in range of his punch. Total v unfair-just like some bullets you can't seem to avoid! Frustrating.

Once again Sunsoft brings out a game based on one of the craziest cartoons of our time. Great graphics ons of Bugs Bunny and other wown characters are comme cable. Crazy sound effect at characters will surely remytt you of the cartoon series. The own drawback I can find here he game play. It takes a bit of time to get used to the controls. Overall, it's a very good game. What's up Doc!

Super NES Bata East Joe & Mac II Action Release: April Levels: 18 8 Mea

Joe & Mac II is really good, It has the play control the first one lacked, and it sort of has an RPG feel to it and according of towns was a nine feature plus the fact that you are find a wife and build really neat. up your The music and animation is a far cry from the first has really easy to get into this folks. This is one of the better action games for the Super Nintendo, I high v recommend this cart.

Wow! I was completely taken by surprise with this one Thinking it was just another mindless action game, Jos & live V proves that blending action are role-playing game. The graphics are absolutely stunning and the jurgle tunes have a great beat. The levels are long and re long and have inte Grorises, but they can also be rather bland in the action department. Overall. Joe & Mac II is a definite hit.

I really didn't care much for the first Joe & Mac mainly because of its poor game play This seque nas really approved on that and also addee a pseudo role-playing feature. mere we e other cool additions, like a pap where you can play eve s villages a visit ir any order and ere you can build on . I totally got into it1 The graphics and music have also taken a step forward. A truly fabulous game!

Better than the first Joe & Mac. This second version has many awesome animations of Joe and Mac and vil enemies Better a senice are a weicome improvement. More things to do like going wound me market and buying items to here the game are any you through eciated, and xcellent, Cool the game power-ups like spit to get rid of your enemies. Can I say...Woow!

Super NES Imagineer Walfenstein 3-0

Action 1st Otr. '94 30 Levels 8 Meg

As it is. Wolfenstein 3-D is a goog game that moves fast, and has a lot to explore While there have been charges from the version that PC years know about the cart is still a very good translation considering Nintendo must have really un changing this one. Good wusic and huge mazes name keep you coming back for more and more. Overall, a very good game and worth buy-

Okay, so the blood was removed Who cares? Then the voices were changed to English. It takes away some of the feel, but hey, this game is still a ot! Not many other games put you in the role of a gun-totic soldier running rampant threagn a man ze shooting rats (oops, nge). The fun there's an of the PC version is here and that makes this game a definite musthave for action lovers.

This is a pretty good translation from the PC. Most everything about the game remains intact e was us weapons. including music and the labyrinths. Conversely, the mussing elements of the game are not er and the Swastikas on the Jabyrinth walls, Nazis passiling assund and the German Sugar ne game play suffers a pit from its PC counterpart. Still it isn't a bad first-person shoot 'em up.

As one of my favorite games on the PC, this Super NES version almost has everything in the sense of the party play. As we know Nimeredo has been known to be the "no xiolence" company Many of the pictures and decorations was been taking out Less gore takes out the game. The rotaty of scaling may not be good as the PC, but it's a good translation. Sound effects are ok. But I still like this one

MAJOR MIKE'S GAME ROUNDUP

The Lawnmower Man T*NO / Super NES

Well the movie wasn't the greatest, and this game pretty much follows suit. The graphics are average but still OK, and the sound isn't the greatest, but the virtua reality sequences are eye grabbing and must be seed.

Turn 'N Burn Absolute / Super NES

This/ game is a complete love/hate affair. On one hand, it is very intense and plays well, but if you don't particularly like this genre of games then you won't be interested in this time can. Give it a try though.

2 8 7 7 7 10 mars & susm mass

RoboGep Vs. The Terminator Virgin / Super NES

Nice try, but this just doesn't hapgen for me. The blood, of course, is gone, and the Mode. 7 sequence is very slow and choppy. The comit book-esque cinema sequences are innovativeand new, but the intensity isn't there.

6 6 6 5 19 PANN A SUSM NO

GA NBA Jam Arena / Genesis

For the Genesis, this game does just fine, and is probably one of the better sports games for the system. The voices are fuzzy and the colors are a pit bland. Bill the game is a very good play—even with four players!

B T 7 B 7

(A) Coofy's History Tour Absolute / Genesis

The Goofmeister just isn't done justice this time around—it simply isn't up to the level of the other Disney video game releases. The control isn't the greatest, and here are too many cheap hits to really make it enjoyable.

Jim Power has a not of cool elements to it. The diversity of game play and the challenge adds greatly to the state of the pseudo. 3-D effect—from Job N. Nothing really special. Such why does the parallax scrotting to the wrong way? Another ust peeve of mine is that you are a one-hit wonder. This make are frustrating game play. If you are up for a real challenge, Jim Power will give you just that. It's to tough for me.

Who needs drugs? Just play Jim Power. If the mind-boggling 3-D effects don't get you, the difficulty sure will be the experienced players, mergans is rewarding with extremely entening levels, dam good mass and those 3-glasses. The JD effect works great, but was eyes will need a vacation. Jesse's a lot of variety with shooter, overhead and side-scrolling sequences. This one is a touchie!

I didn't think a 3-D video game was possible, but the effect in this cart actually works! It's a neat feature, the works! It's a neat feature, the works! It's a neat feature will be seened, the colorful graphics and ness are fine without it. The state moves fairly well, but farefrations cks in when enemies the seened of nowhere so that that have a mandatory hit. It's already a tough game. Why make it close to impossible?

Wait a second. Let me focus my eyesight. OK. The 3-D effects are cool especially with the 3-D glasses. 1911-1911 play it for a long time. Government of the 3-D effect. Making yet or character around is applied of cake. The main facts it had been mowhere, and you don't have the time to react. This game is to resustantly to achieve stardom.

Genesis Konami Castlevania Bloodlines

Action Release: Now Levels: 6 8 Meg

Bloodlines is a great game in detached from the Castlevania theme. The speech effects blow away most other themes carts easily, especially in the Tower of Pisa. It has also yet well, and the choice of two offerent characters was a nits addition. The visuals are good, a zero at a find gloomy. The Bosses are somewhat laughable, but they don't ruin the game Try it, you'll like it.

Well, it looks like the Genesis got inte game it always wanted. Was it as good as expected? On yes! This game dishes to all the bost of the Costevant a series and serves it an one great platter. There's man blook here than you can shakes Congressman at and the play fortifol is superb. The Bosses reaches to see They're beautifully animated and extremely cool to fight. This is one to watch for.

Konami was due for another Castlevania title and comes up with yet another winner in Bloodline This crt has all the great gracines and sounds that Konami is snown in The option of choosine between two characters is coopen. Its men special abilities and analysis are also great. The huge treases rave some of the coolest attacks and special effects. This game is a must-have for Genesis owners.

I admit it. Konami is the king of Castlevania games. Bloodlines is another awesome game from start to fight including detailed graphics so me at the things I noticed. Also the sunds are truly Konam style. Excellent Animations and size all effects of enemies first, in eyr seen in a game befitscare really, what you say "awesome!" Very cool weapons you can pick up. Put me on the wait-list for this one.

Dashin' Desperadoes

Bets East

Genesis

Action Release: Now
Levels: N/A 8 Meg

Dashin' Desperados is a strange game indeed. I like it in a perverse sort of sense. The comical character is a perverse sort of sense. The comical character is a perverse sort of sense in the continual race. It is pecially like the Boss, when you must stop the car to pay your girl. The Two-Player had be is a welcome feature. Airsy cart has limited appeal, but it is fun. If you are looking for a cart that's different, you might like this one.

Dasnin' Desperadoes definitely gets points for originality. The idea is simple: race your opponent to see where the girl. It's a simple concept that is surprisingly fun to play obbing bombs at your opponent or picking up other items as so to the all-out action! The gime is 100 times more enjoy sele with two players since the computer can easily kick your butt. The game can be too repetitive after a while.

This is a weird game, but that's okay with me. I like games with a little originality, especially this one. I like the sonical theme behind it with the sonical theme behind it with the grantes are lice and the music games the humorous theme. I had the car really excels in the twenty of sonical the control of the sonical that is not sonically excels the sonical that is original, it can get boring after a while.

I don't know about you, but this is obviously going in the 'I don't know what type of game' column. One thing ensure it's something different stace is a girl? Well anyway, it you sheek of it this way it's actually a going game Delay your competitor by throwing bombs a similar in any you competitor by throwing bombs a similar in any last for a couple of hours A cool concept that may be good for parties. It could use more weapons.

Ground Zero, Texas
Shooting Release: Now
Levels: N/A CD-ROM

This has got to be the best Sega CD game I've ever played. It handles great, and there's a lot to keep you great, and there's a lot to keep you great your TV. Just where did may dig up those lousy actors through? One thing I definitely dight like was the part where yet road to pit the code in or you blew up. Re rambering the shapes we have found allens is pretty tough. Overall this is the best Sega CD game you can probably consider.

Sega must be trying to get the award for the most live-action games around Ground Zero is probably more of the better ones out. The story line is very good and the scenes have enough randomness to their to throw off the monotony. You stoing, as usual, was B-mome all the way, complete with earhoall dialogue. If you're into these games, this one's decent, but this concept is drying up.

Out of all the Sega CD games with live-action, I would have to say that this is the best of them all. Even average by overall plot is nothing mow, it is still pretty interesting. The graphics are decent and see nusls sets that tone of each sene. The actors could have troph better and the dialogue yet sorny at times. The game is easy to learn, but moving a cursor with the pad is a terrible way to shoot the enemy.

As more CD games are coming out, the games get even better. Like the other live-action games. Ground Zefur Texts is much better laid et in this sense of the footage of the came and the actions you have to do. Very cool sequences was are juite detailed. The must and so mid effects set the tone of the read of the cooling with the pad can get frustrating. It would be cool if you had guin or other weapon.

So this is the game that scared Congress. Himm. When compared to the Sega CD version, it's easy to test that the one is much better. The wider series and the clear picture nets you see the action better that of plays infinitely better you can easily trap the thugs the time. You've got to admit, 3DO's graphics are far superior to the 16-Bit machines. Even though Night Trains and the term of the graphics and some lite, the 3DO machine really exhances the graphics and some. It seems like every CD system is coming out with a live-action game. I don't know about yes, but I've noticed in all of these actors seemed like they were only paid one dollar for their acting. Good game thought.

D/Generation

Shooter Release: Now

Levels: 125 CD-ROM

This game is addicting, fun and a bit gory. The graphics of the main character are a bit cheesy, but the backgrounds are really detailed. The area combination of puzzles with area in a combination of puzzles with area in the graph traps will test be on the area of the controller graph to be controller, and the properties a little fity because the controller graph the perspective are a tad off. This game has the cyber-punk look to it and it comes off really well.

I don't know how this one compares to the PC version, but on the Amiga, it's pretty cool. The game is afficient from anything less live layed. Hunning through a building saving people from blobs is gate fun. The control is awkward since yell must move diagonally and it is controller doesn't accounting the properties of the controller of the controller

Out of the first batch of Amiga CD titles, D/Generation is one of the better games I played. The graphical them saily up to the Amiga Gb-3 capability and the controls were awayard at times. But if you say to past that, D/Generation has game play that is a nice demonstration of action, puzzle agis-frategy. Once you start playing, it's hard to put the controller down as you try and complete just one more level.

Gybermorph
Shooter Release: Now
Levels: 58 5 Meg

I did not really care for this first generation game. It did not fully utilize the power of the Jaguar. Maybe I was excepted too much of this machine but could there at least have been some music during the game? The whole point occllecting poos men't hold my interest very long, but the virtual world was yet least that could be vastly improved on in future games. Overall, I'm a bit disappointed with this one

I'll have to admit that I expected more from the all-powerful Jaguar, but this is a first-generation title. Superior offers some cool features like Ficely shaped polygons and more linear movement, but the sound effects were horrible aget Skyrer was a nuisance. The idea of finding pods on the pressure of quickly. There was a lot of strategy involved making Cybermorph a decent first title.

I wasn't at all impressed with Cybernorph. Although it is on a 64-Bit system, with some neat effects, there leave was nothing about it frait was exciting. Collecting foots scattered throughod the teriain became a bore. There was ne music at all during the game and the onboard computer's value got pretty annoying. You couldn't adjust your ship's altitude. With some tweeking, this could be decent.

My first impression was that the sound wasn't turned up because the effects were so subdued. After you get this light the tinny into must, you are left with simple beeps. While the graphics are OK, the game pies light exciting enough to keep you coming back for more. Bark of the disappointment was the tree expectations and power of the system. I don't enjoy these flight simulators and this wasn't done very well.

Terraforming
Shooter Release: Now
Levels: 8 CD-ROM

Terraforming is a shooter with no real appeal to me. The music is good, but it's a CD game. The graphics are near cheesy, and the Showed Curtan Boss really takes the graphic but this game just doe'nt cut it at all. It plays about average. The entry redeeming feature is are you can use your thrusters as a weapon. Too bad T.T.I. this game could have been much better.

Terraforming is T.T.I.'s latest release? C'mon, guys! This game is completely dull and boring. Shooters are they're nothing spectacular, there are a lot of them making you rearly invulnerable at mass. The music is olde. Many of the tunes don't even match the sels they're for. This could have been a good game two years ago, but the Duo is dying quickly.

Shooters are one of my favorite types of games, but Terraforming is one shooter I just couldn't get into. Aside from the ability to use your ship's the sters as a weapon, there indu was nothing unique about the game. Most enemies maked alies and there were professing our affect types of enemies per 1240. Nice variety. The CD music didn't even match the levels of the game, and acked intensity. Sorry.

I just couldn't quit playing this game. I played through level after level hoping that there would be some awestone; power-ups or something the Gate of Thunder. The game that simile patterns to defeat the chemics and Bosses which make the gate play more pattern overlated and less action packed shoote; is a decent CD type game with good sounds but it needs a better feel and some unique weapons.

What can I say?. It is sized-down version is great. Like the Super NES and Genesis versions, NES and strains a lot of little trick strains strains in the sizes in it to make it dev very will. The game moves fast mayts a little bit too much so with the small screen, the ball other lost is the action a bit. I like a like in the seriously get googly after a while. I seriously recommend this cart if you have a Game Gear.

Fantastic I didn't think this game could be done well on the Game Gear, but it is great. The computer really states the some good strategies of winning. The control is great and the stypics are really crisp and state The sounds, however, are suppointing. The annoying wreales and squeaks when should be an an squeak when should be a state to lid on the ears. Overall, this game will definitely please fans of the arcade while on the go.

Although the Game Gear has some limitations, this game does come off fairly well from a stand-point of an droots translation. Compared to one GG games, the graphics are decent and the game plays very seel. It's too bad that most soft the andesome jams had to be daken out. The play-by-play annotation and to be omitted because of memory problems. Any GG owner who loves basketball will love this game.

This just doesn't have the impact that the SNES and Genesis have. Sure it isn't a 16-Bit system and can't be divided, but it's the features for the property of the commoder in the cade and 16-Bit formers. The traphics are decent and the shands are complemented, with play-by-play, but it needs that edge to push it above average. It does play well though and is a worthwhile title.

DUCES THE R-E-A-L 3DO

MULTIPLAYER.

ore powerful, more colorful, more responsive than ordinary systems. 3DO technology is so real it hurts. And Panasonic makes the only system that has it.

Put on your protective gear; what we've got here is no sissy video game.

You're parreling downfield toward the end zone, eating up vardage when suddenly you see hm. 240 towering pounds and talk about muscles - there isn't a flat surface on this guy! Or anywhere on your screen, for that matter. We're talking near 3-D graphics here.

You take to the left, the right - the program gives you total freedom. But

he crushes you just the same.

First and goal, the crowd goes ballistic, and you watch an instant replay that actually comes up instantly. Before you know it, you're in formation again. Breath short. knuckles wnite, heart pounding - this is a video game that makes you break a sweat. This is R-E-A-L.

Quarterback perspective with EA's 3DO™ John Madden Footba I™

Introducing the Panasonic R.E.A.L 3DO Interactive Multiplayer, the most highly-evolved integration of audio, video and interactive technology available. It plays audio and photo CDs, and soon, with an optional adapter, video CDs. It will introduce you to a stunning new generation of interactive education, information and entertainment software. And it makes video gaming come to life.

With 50 times more power than ordinary video game systems and PCs. Up to 16 million displayable colors for photorealistic picture quality. Digital CD sound (with right and left outputs for stereo hookup). And a 32-bit RISC chip architecture that makes interaction fast and furious.

All of which means less lag time, better visuals and more play options as you lead your team downfield. In other words, it's real.

...D-MANN RATES THE SENATE...

...Time to strap on the D-Cells and plug in for power, as the Q-Mann delves deep into the world of gaming gossip! Yours truly went out of his way this month, my Quarter-Friends, for the straight scoop on the hottest news for hardware heads! While we'll uncover the latest from Sony, the Q also kept his ear to the ground and came up with some special info on Nintendo's upcoming super system and a Wonder-Mega update! So recharge your Ray-C-Vacs and sit back for the good stuff...Hot on the Q's list of heavy hitters to be is Sony's new PS-X mega machine, which not only promises advanced polygon technology and RISC processing (the latest catch-phrase in every new game system's arsenal of engineering tricks), but also promises to have some major software muscle backing up its release. The Q-Mann hears that Capcom and Konami have both committed to the unit, as well as Namco which will be bringing their super coin-ops like Solovolu and Galaxian 3 into the home market!...In related news, Q's main man in the Land of the Rising Sun has confirmed that Capcom's first foray onto the PS-X will be a Street Fighter 2 "Legends" package that includes Street Fighter 2, Street Fighter 2 - Champion Edition, Street Fighter 2 - Turbo Hyper, and Super Street Fighter 2 all on one CD! This is a major coup for Sony, which hopes to have the game systems in front of everyone by the end of the year...

...Speaking of other software releases tied to new mega-systems, the Q has learned that the might 'N has already busted open the design team of the Mario adventures and plotting has already started for the fifth entry in the series. The new Mario 5 is expected to debut as the pack-in for the Project Reality machine in '95, and, according to a source deep within Nintendo, it will take advantage of PR's rendering and modeling capabilities to create Mario worlds unlike anything that has ever been seen before...Also due from the Nintendo front is a monstrous 32-Meg update to last year's Super NES hit, Star Fox! The sequel is expected to get the bow at the Summer CES with an in-store target date of X-Mas '94. The preliminary specs are scorching, with two-player simultanous action and a real environment that let's you fly within and around three-dimensional objects, a la Atari's Steel Talons...

...The boat is rocking on the 3DO, and from what the Q has heard, the waves are only going to get higher! Look for an enhanced 3DO that incorporates all of the advanced architecture that wasn't ready when the machine launched last year to hit stores sometime in '94, as well as a broadening emphasis on the console as an enhanced game machine that can play movies and more... Yours truly has also heard that some of 3DO's partners are getting edgy about the initially slow sales of the \$700 super system. While the Q still feels it's a little too early to tell, considering the majority of the slick softs won't appear until later in the summer, the company did delay another stock offering as the company's market value continues to plummet. Unless 3DO is successful in either a) lowering the price of the machine or b) expanding what it can do, the unit could stagnate even further...

...Still more new release info for tech-heads on the hardware horizon. JVC's lost shadow, the Wonder-Mega, is expected to hit stateside later this year with a new shell and a new name (the X-Eye). Packed-in with the new Mega will be a Compton's Interactive Encyclopedia (informative), a CD+G Karaoke disk (interesting), and an ew Sega CD game release (entertaining). JVC is ramping up to make educational games a focus for the new machine but, c'mon fellas, get a clue from 3DO! You can't enter the games market with a hunx of hardware that costs more that the television its played on!...The Q-Mann rates the C-PAN debate over violence in video games: The Winners - Bill White, who cooly weathered the storm as the spokesman from that vile and evil game company called Sega that was trying to exploit women, corrupt young children and bring about the general destruction of society as we know it! The Q loved your performance, Bill, and you took some great jabs at the big 'N while you were at it (who cares if he shook the congressmen's hands first!). The SPA also scored some points against the Big 'N by defending you, but then again, Nintendo spotted a conspiracy (hal)...The Losers: Howard Lincoln. This guy is the consummate white shirt, and his defense of the video game industry suddenly became a PR speech for Nintendo! Anyway, the Q did enjoy the comment about the Super Scope being used for shooting targets (who cares if they're the kind of targets with exploding heads!)...All in all, it was a great four hours had by all!...

...Elvis is dead, Juli, cope with it...That does it for the latest wave of the Quartermann attack, so load the photons and hit hyperspace, it's time for the Q-Mann to fly...

SEGA DEBUTS PORTABLE CD!

If you think the Sega CD will just curl up and die when the mega hot Saturn comes out, think again! In a very bold move, Sega has just debuted a new portable Genesis and Sega CD combo unit. Called the Genesis CDX, Sega's new mini system will be small in size but large in performance.

First the specs. The new lightweight Genesis CDX will be only 7.8" wide, 5.5" deep and 1.8" high. It will only

The Genesis CDX combines the Sega CD and Genesis in one portable unit.

weigh about a pound and a half! None of the Genesis or Sega CD specs, like resolution, color palette etc., will be different from the existing systems.

The bad news is that there isn't a screen with the unit—so don't throw away your Game Gear quite yet!

So what good is the system?
Unknown. You can use it as a portable CD player. But since it costs so much, I wouldn't want to be bouncing it around a lot.

It will be available in March for about \$400. Ouch!

JVC INTROS U.S. Wondermega!

JVC has just announced that they will be bringing out an American equivalent of the Japanese Wondermega.

Technically called the RG-M10 and officially named the X'EYE, the new system will play both Genesis cartridges and Sega CD discs. Besides the games, the X'EYE will also play karaoke, CD-G and audio CD discs.

Players will like the new sleek style and the all-in-one Genesis and Sega CD system, but it goes well beyond just a nice looking system. For those players looking for superior audio from their games, the X'EYE has an exclusive 1-Bit PEM D/A converter which offers an eight-times over-sampling digital filter. This allows for cool effects like echo and bass enhancement.

JVC plans to market the X'EYE as more than a game machine, as included with the system will be Compton's Interactive Encyclopedia! A CD+G Karaoke disc and a Sega CD game will also be packed in.

The system should be in the stores around April with a suggested list price of \$499.95.

JVC will bring out the X'EYE, the U.S. equivalent of the Wondermega in 1994!

SEGA CHANNEL IN HOMES NOW!

In a special agreement between Sega of America and Time Warner Entertainment Company, the Sega Channel was born. This special station makes possible a menu of 50 games to its users. From action games to sports titles, all types will be available through a selection on a menu.

What do you need to play your choice of 50 hot carts? A special cartridge that plugs into your Genesis is all you'll need. Of course, your cable system has to offer the Sega Channel.

When? There are 12 test markets already, and the Sega Channel will go nationwide this fall. Finally, the station will go international in the winter of this year!

Another question you might have is: How much is this going to cost? The Sega Channel will be priced in the same range as regular premium channels. So it shouldn't be too expensive.

Just think, 50 games, some before they're released in stores! Pretty soon players everywhere will enjoy all the great Sega games. Wow!

Sega is ready to roll out the Sega Channel to cable systems this month!

ARCADE-QUALITY JOYSTICKS FOR THE SUPER NES, GENESIS AND NEO•GEO!

Gamers tired of their pack-in controllers and wanting something more (closer to the arcades) out of their gaming experiences may want to check out what the California-based

Neo•Geo owners will definitely want to check out the MS Systems joystick!

MAS Systems is offering. Although MAS Systems is a relatively new company, they have researched the video game industry for over 10 years, learning what gamers like, dislike and what they would like to own. The result is a line of peripherals completely made in the USA, using only the finest components available. Suffice to say the two joysticks here can only be described as two of the best ever released and are things no "serious" gamer should be without.

The first is the Neo•Geo joystick, which retails for about \$79 and has the standard four-button configuration of the pack-in as well as a Slow-Motion

Try King of the Monsters 2 with the new MAS systems joystick! Raaarrrrrr!

button and four turbo buttons to eliminate having to rapidly tap away. After playing a few rounds of King of the Monsters 2, Fatal Fury Special and Samurai Shodown, you'll never go back to the pack-in controller again! All of these games played better than with their pack-in joysticks, especially King of the Monsters 2 when you have to rapidly press the button to get up after having been knocked down. (You are saved the trouble of having to rapidly tap the button by simply turning the Turbo button on). The best aspect of this joystick is its sturdy designespecially the way the stick quickly recenters after each movement. Even after hours of intense play, the joystick held up beautifully and still remained incredibly responsive.

Mai Shiranui totally toasts Duck King in Fatal Fury Special! She's bouncy!

The Neo*Geo is not the only system to be blessed with fine joysticks from MAS Systems. There is also one that is compatible with the Super NES and Genesis systems. Like the joystick for the Neo*Geo, this one is equipped with Turbo buttons, Slow Motion and Mode buttons for Genesis games that are only three-button compatible (much like the one on the side of the Genesis sixbutton controller). Some games worked better than others. Not surprisingly, the arcade conversions worked best. Street Fighter II Turbo can be played the way it was meant to be. Dragon

Mike's Dragon Breath is simple to do with the MAS stick in TMNT: TF.

Punches, Fireballs, Hurricane Kicks and other special moves can be executed flawlessly on both the Super NES and Genesis platforms. However, games that went directly to the home systems took a bit of practice, TMNT: Tournament Fighters for the Super NES was one such game. Some of the moves took a lot of practice to do (like Mike's Ball Attack and Rising Thunder), others were simple to do with the joystick (like Mike's Dragon Breath fireball) yet hard to do with the pack-in Super NES joypad. The Super NES/Genesis joystick shown here costs \$105 or \$85 without the Slow Motion and Turbo functions.

These joysticks don't come cheap, but for arcade fans, they are a dream come true! For more information on these and other arcade-quality peripherals, call MAS Systems at (714) 831-5760 or write them at 25825 Via Lomas #206, Laguna Hills, CA 92653.

MAS Systems also has an arcade-quality iovstick for the Super NES and Genesis.

Even though Punky Doodle is easy to learn, it is not easy to master. There

are 31 levels with more than 150 rounds! Whew, that's a lot of playing time!

Punky Doodle will definitely appeal to a broad range of age groups. The graphics, while not too complex, are clean and colorful. The sounds are also above average. All of the playing elements, including the 50 or so enemy characters, come together wonderfully to give the player a very enjoyable game.

If you're tired of blood, shooting, fighting and all that other gore, give Punky Doodle by Sunsoft a couple of quarters. Odds are you'll be instantly hooked by this brain teaser!

O WENT DUTYS TO USE THE BOOK OF SHEET SHEET OF SHEET S

RAIDEN II by Fabtek

You'll be blown away by the selection of deadly weapons at your disposal.

Some of the levels contain more than one Boss, each with its own strategy.

If you were to list the all-time greatest arcade games in history, you'd probably omit the original Raiden. However, you would be wrong to leave it out because the original Raiden has been on the charts since September, 1990!

Because of its fantastic success,

can be found throughout the game.

Fabtek has followed up this arcade legend with Raiden II, and it looks to be every bit of the legend as its predecessor! A vertical-scrolling shooter, Raiden II can be played by either one or two players simultaneously.

While it is a challenging game, Raiden II is not overly difficult. As a matter of fact, Raiden II employs a kind of self-adjusting difficulty level which will change according to the player's ability! This will allow both the advanced and the novice players to enjoy the game equally.

There are eight levels, each of which has a different Boss. Some of the levels even have multiple Bosses, each having its own unique attacks and weapons. This makes for exciting game play because you must learn the technique to defeat each one.

There are lots of goodies to pick up in this shooter, too! You can get bombs, missiles and lasers as well as the devastatingly powerful cluster bombs. With a few of these puppies under your belt, you're ready to rock and roll against the enemy!

The sounds and graphics have been improved, tool Particular attention has

been given to the smallest of details to give Raiden II a highly polished look and feel. The game plays like a dream! The control is totally outstanding and is limited only by the player's ability. Fabtek has done a great job recreating one of the all-time greats of the arcade!

Lift off with the sequel to one of the most popular games in arcade history!

INTERNATIONAL NEWS

Welcome back to another sidebar chock full of news. It's me, Terri Aki, once again digging deep and going behind the scenes to glean every bit of info I can for my loyal readers.

There are two big stories this month. The first is a look at Bare Knuckle 3 (AKA Streets of Rage 3 to you). This mega-hot sequel looks to be the best fighting game in a long while. It redefines the capabilities of the Mega Drive. Whew!

The second story is the upcoming release of Final Fantasy VI. This 24-Meg installment in the magnificent line of RPGs is 10 times better than parts four and five. Also on the way is an anime simply entitled Final Fantasy. There's more about it up ahead.

Other games that are in the works include Kikikaikai 2, the sequel to what we know as Pocky and Rocky. Natsume is making this one better than the first.

Nintendo announced Super Metroid (Finally! It's about time!). It clocks in at about 24-Meg.

Taito is bringing the classic Space Invaders to the Super Famicom in a new cart called Space Invaders: The Original Game. Overall, there are more games than ever to enjoy!

Unknown

Axel, Blaze and Sammy—the fearless heroes of Streets of Rage 2—are back for another butt-kicking crusade to rid their town of vermin. (Bare Knuckle is what the SOR series is called in Japan. Who knows why Sega changed the title?) Although Axel and Blaze have been unchanged, Max has been dropped in favor of Zan, a wrinkled, bald old dude who has been transformed into a bionic fighting machine by an evil organization. Sammy, too, has grown into a lightning quick teenager from the beaming youngster of SOR 2.

Although the concept and style remain unchanged, several new features have been added. The game has multiple story lines and there are new ways to use weapons, too. Another feature is a new kind of stage where you can ride motorcycles and runaway rail carts.

Clocking in at a whopping 24-Megs, Bare Knuckle 3 is shaping up to be the biggest and the baddest.

This is simply the best side-scrolling fighting game in a long time.

You have four fighters to choose from. Each one has a lot of special you moves. Can you find all of them?

Burn down the road on your motorcycle. Knock the baddies off of their bikes.

Do some high-step stompin' in the dance room. Use your special moves!

Two players can work together to do new fighting tactics. A great way to win.

Anime videos and laser discs, based on Square's magnificent SFC Final Fantasy RPGs, are in development in Japan. Simply entitled Final Fantasy, the video series will consist of four chapters of Wind, Fire, Dragon and Stars, each running about half an hour. The cost of each chapter is expected to be ¥5.400 (about \$50).

The story takes place some 200 years after Final Fantasy V. The hero is a young adventurer who becomes entangled in a grand journey of epic proportions. The heroine is directly from FF V. You'll even find FF familiars like the Chocobos and Cid the flyer of Airships.

The first chapter should coincide with the launch of Final Fantasy VI sometime in spring. I'm eagerly waiting for it. It looks to be really hot. It does justice to a great series.

This series is being done by a number of famous animation artists.

We finally obtained shots of the Split Screen Two-Player Mode of Virtua Racing! The screen is divided into top and bottom halves in the same style as Super Mario Kart. Despite the intense number of crunching needed to display this mode, surprisingly little background details have been sacrificed. Better still, it is possible to change the vantage points for each person! Unlike the arcade version, the Two-Player Mode will enable such options as tire grip, computer opponents and time limits. Races can be held at all three courses at all difficulty settings. This sizzling hot racer is almost here. Stay tuned for more...

The Final Fantasy series continues on in Japan with this massive 24-Meg sequel. It takes place in a land long ago where magic has been replaced by technology.

The story follows Lock Cole, a treasure hunter (a thief) and his partner Mog, a furry critter with wings. They get wrapped up in a series of events that begin with a mech invasion of a small town. One of the pilots is left behind without her memory. Together the group must journey in a quest that will take weeks to solve.

We reported last month that NEC began selling Pioneer's LaserActive system under its own brand name. It turns out that eight of the bigger PC Engine CD-ROM games won't run properly on the LaserActive System, including several hit simulations. NEC blamed the programmers who strayed from PC Engine's operating system format to cut down on annoving disk access. Embarrassed NEC and Pioneer officials vowed they will test new PCE software to ensure compatibility with the LaserActive Systems. The producers of the affected software are supposedly working on solutions of their own. Let's hope they find an answer soon, or a bunch of players will be very unhappy!

Supposedly, the LaserActive can't play some of the bigger CD games.

Some great games like Fatal Fury 2 can't be played on the LaserActive!

Sega's big arcade hit is headed down the turnpike straight to the Mega Drive. All eight cars from the sizzling coin-guzzler original can be chosen for one- or two-player competition, including Speed Buster and Road Monster. Because each machine has its own characteristics, it will take you a while to find which car suits you best.

The colorful settings and cool tunes are straight out of the arcade version. Two new modes have been added, a Head-to-Head Mode against computer drivers, and an International Round Trip where you can earn big bucks. This is as good as the arcade title!

Each person can choose their own car. Race for the goal and win big!

Check this baseball glove out! Pretty snazzy, huh? Um, no, not that hideous banana vellow colored glove. But don't worry about the goofy looks, Mizuno of Japan's new Air Fit Glove is a great new idea. This puppy features an air pump that is used to inflate the inside of the glove to provide the ultimate in fit, comfort and grip. Needless to say, the glove's padding and air cushion assure excellent protection even while providing outstanding flexibility and control. Even better, it is extremely light so you won't be dragging it around when you're out in the field at the bottom of the ninth. Let's hope they come out with some better colors soon!

It sort of reminds me of those shoes they had in *Back to the Future 2*. The technology we've got is getting better all the time. Who knows how our sports will be played a few years down the line?

Simple advancements like these will assuredly make sports more interesting. Like most of the things I show, these won't reach your shores.

Oh well, I might as well stop complaining and write some other things. Onto the next set of facts, folks.

Last month, we gave you technical specs about Sony's upcoming 32-Bit game system code named PS-X. In a nutshell, this baby can rocket with full high speed 3-D graphics and CD quality sounds. For example, it can smoothly perform "tweening" between two fully texture mapped 3-D objects. By specifying the starting object and ending object, PS-X can smoothly morph all the steps in between.

Of course any fantastic system is just a useless box without decent software. On that score Sony appears to be shoring up support by making it easy for licensees to produce software by only requiring nominal royalty fees and accepting production lots of less than 100 units. Sony also claims it is easy to develop software as

The first major producer to sign on with Sony was Namco. The deal covers not only development of software, but also research and development of arcade games using the PS-X. Although Namco would not reveal any planned software, they admitted the possibility of translating their ultra-cool hits like Galaxian 3 and Ridge Racer.

Shortly after Namco's announcement, word leaked out that Konami, another heavyweight producer, will become PS-X's second licensee. And, Capcom has also signed on (32-Bit SF2?). Things are looking up for the PS-X all of a sudden

In contrast to the PS-X's improving viability, question marks hang over 3DO in Japan. There has been very little word on software. (Japanese producers have been ominously quiet about any software they have in development.) The system's credibility was dealt a further blow when Sanyo, a major electronics maker, announced they shelved their plans to release their own 3DO machine. Their decision to withhold launch now indicates a lack of confidence in the system. What will happen? Only time will tell.

Despite the strong start, the 3DO isn't doing all that well in Japan.

Building On A Strong Foundation

In the world of video games, what you <u>don't</u> see is often more important than what you <u>do</u> see. Like the stability and financial strength that lies behind every game that bears a company's name.

We've been around a long time and have released our share of hit titles. With more big hits on the way. That's because we've always been very selective in choosing which games bear the Seika name. A matter of quality vs. quantity. So rest assured that whether our games deal with medieval adventures or futuristic super heroes, we'll be around to support it — Tomorrow.

Really. What Could Happen On The World's Greatest Cruise Ship?

Well, it could set sail with lifeboats for only half the passengers aboard. A huge storm could send tsunami tidal waves crashing down against its hull. Lightning could strike and set off several fires on its deck. Its wireless operator's desperate taps of SOS could be ignored completely. Worse yet, you could actually be on board!

But hey, keep your head above water; you've got 45,000 tons of ocean liner, not to mention 2,300 people who look to you to keep them from sinking.

NEW SOFT NEWS

With the Winter CES just a few days away from when I write this, I've found that most of the companies have gotten pretty quiet on the video game front. Finding new and tasty lidblis of lafe is harn to do, but here's what I got for you.

Konard a name we all recognize, has a few games in store for us in the near future. They have licensed the comical antics of the Animaniacs and the action of the Biker-Mice From Mars. They are also working on Hyper Dunk Basketball; the Play-off Edition, a lightning-quick sports the that!! keep you playin.

Also from Kemco is a wacky facing game called Crazy Chase. You're a clown-like sunner trying to pace yourself through a number of peculiar obstacle courses.

And...saving the best for last, Sega has just introduced the Genesis CDX. a portable Genesis and Sega CD all in one! Wow is the first thing that comes to mind, but what about the Game Gear? Also from Sega is vom Cat Alley, another CD title.

Crazy Chase By Kemco

Seika

Super Turrican 2

Super NES

Action

Last month we showed you a sneak peek at what might be one of the best action titles of the year: Super Turrican 2. Going above and beyond becoming just a simple sequel, this all-out action game brings you more weapons, more technique and a lot of hot levels to go through.

Seika is still working hard to make this the best it can be. More enemies have been programmed in since last time, and all new features like an armored war tank are now here. There are all new effects that can't be described with mere words in this cart. For example: the first Boss pulses with a weird life of its own. Strangel

Keep looking in the pages of EGM to get the latest news on this radical new action game.

Fight your way through the maze of an alien's innards. Mmm... tasty!

You can now ride in armored vehicles over the sand dunes.

The beam-weapons have additional effects when you fire them.

Snake-like beasts burrow out of the sand to attack you.

Super Drakkhen

Super NES

Action/RPG

You probably don't know that there is a sequel to one of the first RPGs for the Super NES. It's been a while since we've played Drakkhen, but its sequel improves vastly on the original.

The game play is more action oriented, plus less emphasis has been placed on the 3-D sections (though they're still there).

The graphics to this new game are much better than before as are the sounds. There aren't many RPGs out on the market, so you might want to consider checking this one out.

The 3-D scenes are better than ever and with a lot more detail to them.

The towns will offer you aid throughout your cumbersome quest.

There is plenty of fighting for action buffs as well.

Bullet-Proof Software

Twisted Tales of Spike McFano

Super NES

RPG

Bullet-Proof Software has a brand new RPG for the Super Nintendo called The Twisted Tales of Spike McFang. Its game play is reminiscent of Zelda or Soul Blazer. You control a magician guy of some sorts, and battle zany looking monsters in a tripped out role-playing world. The farther you go along, the better the powers you'll receive.

To match the comical look, hilarious animations have been added to give

The palace is the place where your first objective lies. How do you get in?

this cart a distinctive flavor. For example, when you face a giant stone head, you'll run right through a wall. Look to these pages for more info.

Your pet frog has a key that allows you entrance into the palace.

You will learn new techniques the further you play into the game.

Philips

Voueur

CO Interactive

Inter. Movie

Voyeur is a game for adults on the CD Interactive unit. It has a Lock-out System Code, so that younger players won't be able to see the rather risque scenes.

The plot focuses around Reed Hawke, a millionaire and presidential candidate. He is a real sleaze, and it's up to you to collect enough footage with your camera to stop his campaign. You will peep into his life and of those around him. Murder might be committed which you might have to stop. The game changes each time, and the video footage is great.

Voyeur is a sensual thriller that really puts you into the game. Of course, this game is strictly for adults as adult situations are often portrayed. Definitely worth trying out.

You must use surveillance cameras to spy on the presidential candidate.

Peer through the windows and lives of Hawke Manor. Solve its mysteries.

Culture Brain

SD Golden Flahter

Super NES

Fighting

A hot new fighting cart is on its way compliments of the folks at Electro Brain. Entitled SD (Super Deformed) Golden Fighter, this game features a number of cartoony characters in the struggle of skills.

Even though we've yet to hear from Golden Fighter, the super deformed version is really quite outstanding. The moves look spectacular, and the graphics are colorful. The great diversity of fighting forms is clearly evident here. The characters range from mystic warriors to dragon-like griffins.

If you still haven't been able to whet your appetite for intense fighting, SD Golden Fighter may just appease the beast in you. Overall, this is a game that you should be on the lookout for. It's very cool.

SD Golden Fighter will turn into an all-out slugfest in no time at all.

SD Golden Fighter looks good, especially when seen in action.

Each of the fighters has an array of powerful special moves to use.

There are even giant beasts to battle in this fighting game!

Fire Striker

Super NES

Action

DTMC has created a brand new cartridge for the Super NES that combines some old genres to make a wholly new type of game. Fire Striker has you (and a possible second player) trying to thwart the forces of evil using magical fireballs. With this power, you will travel across the land, trying to free the seals that hold the elements under control.

OK, get this... Remember the old game of Breakout? That's how Fire Striker is played. You must swing your sword to knock the ball higher up. To clear the stages, the fiery projectile must be flung to the top of the screen. To stop you, monsters like slimes and skeletons will pursue your hero (you have a choice of fighters.) around the screen. You'll lose a life when you lose the ball through the bottom of the screen, or if you get hit by too many monsters. To clear the seals, a giant Boss creature appears to attack.

Fire Striker is a fun game to play. It's very different, and not all that violent so all players can enjoy it.

The king will send you out on your quest through the kingdom.

As you can see by this map, the game is really big and involving.

HOT RPG-TYPE ACTION?

You can really power-up if you can find the treasure chests.

Hit the door 20 times to clear the way to the main enemy.

Frigid boulders will tumble down the icy mountains.

The Bosses have magical powers to kill off your fighters.

THE BOSSES

WOLFGANG KRAUSER

The greatest fighter in the world.

LAWRENCE BLOOD

The bull fighter from Spain

AXEL HAWK

Fearsome Boxer from the U.S.

Staff master from London.

Takara

Fatal Furu 2

Super NES

Fighting

The high intensity fighting of Fatal Fury 2 comes home on the Super NES with almost everything intact from the hit arcade game. Takara has put a lot of effort into this near-perfect rendition. All the characters and levels (along with every single special and power move) are in this game!

The cart is a fighting spectacle. The playability is fantastic and the moves are done the same way they are on the Neo•Geo version.

There is a diverse selection of characters (play as the Bosses? Hmmm.). from the awesome Andy Bogard to the bestial Big Bear.

If you want a decent fighting cart, this is one to look for. It is an amazing translation of the Neo•Geo cart. I wonder how they shrunk it?

Cheng and Jubei clash with both of their special moves blazing.

Each character has a number of special moves, plus power moves too!

BONUS ROUNDS!!!

Andy nukes his brother Terry with one of his power blasts.

The gigantic Big Bear roars right into Mai, the nimble female ninia.

Tai kickboxer Joe Higashi whips up a tornado at Kim Kaphwan.

You can play the same character versus himself without a special code.

Bash pillars and blocks to rack up points within the time limits.

Philips

Hotel Mario

CD Interactive

Action

The first platform game for the CDi features Mario and his ongoing battle against the Koopas. It seems that King Koopa and his children have gone into the hotel business. Mario and Luigi must go from floor to floor wiping out Goombas, Troopas and closing all the doors, If you close all the doors, you'll get past the level.

With CD sound and great control, you'll enjoy Mario's latest adventure. It'll remind you a lot of the original Mario Brothers game. A good choice, if you want fun action.

Mario and Luigi have cinematic displays for their adventures.

Morton Koopa Jr. has opened up a hotel inside of a tree!

Go from floor to floor slamming all of the doors shut. Stop the Koopas!

Racing

For some of the best racing action on your Game Gear, there's Micro Machines. This fast-paced racer is ripping down the road to a store near you. Done by Codemasters (the same people who brought out the terrific Genesis version), this game has very little lost in the translation.

Unlike most portable racers, the control is really top-notch, and there's a number of vehicles and tracks to race on. You can go off-road or zip

Float around in a tub in the race with the miniature speedboats.

around in a sports car. There are even tanks for those military players! Micro Machines is a good racing game if you're into this type of cart.

On the sports car track, you'll really be high up on an oversized table.

Avoid all the cereal. Oat bran is really bad for your health in this cart!

Get ready to slash your way through 15 stages of menacing mechanical assassins with G2. You control a mammoth size mech with awesome capabilities. Your main weapon is your sword, with which you slice and dice reientless hordes of mechs.

G2 is graphically intense, and there are all sorts of dangers awaiting the unwary. At the end of each zone, a giant Boss will threaten to take you apart piece by piece. G2 will pit your skills against a number of enemy me

If you want a good action game, G2 will be coming out soon. Look for more more info later on.

Crystal Dynamics

The Horde

300

Action/Sim.

A hot new strategy game is on it's way to the 3DO compliments of Crystal Dynamics. The plot line is simple. You are in charge of a small, but ever growing village. Unfortunately hordes of goblins and such have been staging raids and killing many innocent people.

You must build up a defense for the town, along with a small militia. Then when the baddies come along, you will fight. The goblins will rip and kill anything in their path. Nothing is safe-not even cows or trees.

If you have a 3DO and are looking for an involving strategy cart, you might be attracted to The Horde. Its quick-moving, easy-to-learn play is quite addicting. It's even got blood in it. Can you save your village?

Fortify your village with pits and spikes, but make sure you can move around.

Use the maps to plot your strategy against the forces of evil.

Robotnik is starting to really play rough! His energy cyclone can suck you in!

Where would an action game be without an Ice Level? To start off. Sonic makes a superb entrance that ends with blundering (however humorous) consequences. From then on, you must tace frozen waters, platforms that are propelled by your own speed hitting the sides, and gigantic chunks of ice that provide an easy way to get around as well as a means to bust through giant walls of ice! There are plenty of traps and all the power-ups, items, and other things are frozen—pending your. Spin Attack to break them open. This level has plenty of surprises!

Some lead into indoor installations, while others could lead into a giant water system loaded with pipes and badmicks! There are also transport elevators shifting you from ser tion to section and water pipes that can carry you for miles! A STATE OF THE STA

Interplat

With its library of recent hits, Interplay is fast becoming one of the best video game software companies in the industry. Great games such as Out of This World, The Lost Vikings and Rock 'N' Roll Racing, to name a few, are some of their best and most popular titles.

With the new year in full swing, Interplay will continue to have gamers begging for more with their incredible lineup of games.

First will be Night Mare, which is an action/adventure game much like the highly acclaimed Out of This World. This title features a unique story line about a warrior destined to save the world from evil. There are plenty of beautifully drawn scenes with some of the smoothest character animations around. Next is The Lord of the Rings. a role-playing adventure based on J.R.R. Tolkien's classic fantasy tale Like Night Mare, there are literally thousands of frames of rotoscoped animation. There is also a multi-player feature. The other title on Interplay's release schedule is Clay Fighter 2. Players are promised more moves, more hidden moves and new stages; as well as some other new features not yet available. There's also some talk about The Lost Vikings 2. The story and the features are not yet known at this time.

With a lineup like this, it looks like a banner year for the guys at Interplay!

THE COOL CINEMAS!

In Interplay's Night Mare players must delve into a world veiled in evil. Only the most skilled of warriors will bring order to this dark realm. This new action/adventure features the play elements that made Out of This World such a hit-awesome rotoscoped animation, challenging puzzles and excellent game play! There are other new features that have been added in the game as well, such as the ability to arm yourself with a weapon and aim it to your back even when you are facing forward. You can also hide in the dark shadows of the scene and elude the numerous enemies or make them miss their shots at you. The graphics are very well drawn with a dark theme. The beautiful backgrounds will give you the sense of almost being there. The music is very well done, also adding to the feeling of chaos!

Arm yourself and be prepared for potential danger as you venture through the caves.

Your character can hide in the shadows as the enemy fire upon you.

Pick up various items like bombs to help get through some locked doors.

Now, the lands of swords and sorcery come alive. Prepare yourself as this treasured Tolkien tale-The Lord of the Rings, Volume 1-takes you on an epic adventure through Middle Earth. This amazing game faithfully follows the adventures of the hobbit Frodo Baggins on his guest to destroy the One Ring that has the power to end Middle Earth. You find yourself in the story playing the able leader of a

FOLLOWING THE HUGE SUCCESS OF CLAY FIGHTER, THE EGM **EDITORS WENT BACK TO** INTERPLAY TO SEE IF THEY HAD ANY PLANS FOR A SEQUEL. HERE'S THEIR STORY...

Our editors have a nose for news. With Clay Fighter still hot we had a feeling that Interplay had a story to tell about a sequel. Not only did Jeremy Airey (the lead CF2 programmer) give us a behindthe scenes look at some of the models that are being considered as backgrounds for the upcoming CF2, but he also gave us an insight as to how they will make the new game that much better than the first!

EGM: How about a funt and to what we we see in Clay Fighter 2?

Jeremy: We're only going to keep two the original characters. We will have many more, possibly go up to 10. Maybe even have some secret characters in the game. After looking at Mortal Kombat II and all that secret stuff, we'll go the same route. And we're doing some stuff like Eternal Champions did. This will be really hot!

EGM: When will the game come out? Jeremy: We're looking at July-August for the Super NES version and June-July for the Genesis game

EGM: I see you have some models of new backgrounds (see pictures), how long does it take to make these? Jeremy: The large Frosty one took has weeks to do, but as we get more exper-

ence, we can do about two per week EGM: Will any of the backgrounds be interactive with the player as we have seen on some of the other fighting game. like Samurai Shodown?

Jeremy: We were trying that with the first one, but it didn't seem to work very well. I don't think we'll do it in this version. EGM: How about giving the characters

Jeremy: We're going to do a lot of that type of stuff. Hidden characters, special codes that do certain things, you know, stuff that will really set CF2 apen from

EGM: What are the specs on the cart? Jeremy: We're shooting for a 16-Meg cart. The music and sound effects will be much better than the first and there will be great voices.

FEAR NO MORE! ENIX AND EGM HAVE TEAMED UP TO ANSWER YOUR PRAYERS, HERE ARE SOME QUESTIONS-AND THEIR ANSWERS-THAT MAY FIT YOUR SITUATIONS.

- Q. I wish this game had a map that i sted all of the towns, castles and caves
- A. Here it is! Remember you only have two wishes left!
- Q. I found the Wind Rune in the cave of Melename. The problem is one of the other apprentices stole it. How can I get it back?
- A. This is a very common problem. If you have had the Wind Rune stolen and have not travelled past the town of Eygus, I usually suggest that people reset the game. The problem is that the apprentices in the early sections of the game are very difficult to beat. Usually you have to get EXTREMELY lucky in order to defeat them It would take you about 45 minutes to obtain the Wind Rune from the start of the game. It may take you in excess of five-six nours to beat this apprentice. If you remember to save the game each time you enter a town, you will be able to simply reset the game if you should lose your Rune. This will allow you to start from the last place saved. So, you should be able to prevent anyone from stealing your Runes
- Q. In the cave of Melename, I see a doorway, but there are some rocks blocking the entrance. How do I move
- A. Travel to the town of Zellis Enter the inn and speak to the villager inside His name is Brantu Brantu will join your party as a third person and will open the rocks blocking the doorway. If Brantu will not join you, return to Bonro and get the map from Gain
- Q. How do I get the Water Rune from the wizard in the town of Guntz?
- A. You must continue talking to the Wizard in Guntz until he agrees to trade you the Water Rune for some water.

 Next, travel to the viviage of Pell, in the tavern, you will find a villager named Digger. Once he has joined your party, travel back to Guntz and Digger will bring the water. The wizard will now give you the Water Rune. Q. I keep hearing about a secret entrance in the town of Patrof. Where is this entrance and will it allow me to enter
- the castle? A. If you search each of the tombstones in Patrof, you will find one that reads: "Do not disturb " Stand beneath this
- tombstone and push your control pad up. The tombstone will move, revealing a secret stairway. Yes, this stairway will lead you into the castle.
- Q. There is a rock in the cave of Milto that I can't seem to move. How do I move this rock?
- A. You must have three Runes to start this process. Enter the town of Bone and look for a little boy. If you talk to the boy, he will ask you a question about Bonro If you answer "No," he will either give you a remote control or ask you to take him to Bonro. The remote control will open the rock in the cave of Milto. If you take the boy to Bonro, his uncle will arrange for you to take a boat ride. Both of these options accomplish basically the same thing. If you get
- one, you will not get the other. Q. I defeated the dragon in the village of Luze. The game tells me that the Rune has been storen. How can I find it?
- A. Since there is no way of preventing the theft of this Rune, you need to try and locate the apprentice who stole it Try returning to the towns you have visited already via the Wind Rune. Once inside a town, step outside. Look in your crystal ball located in the upper left comer of the screen. If the circle representing the town is flashing, the thief s in that town
- Q. How can I enter the Tower of Grime?
- A. If you have Owan as your main character, travel to the town of Bone. Once in Bone, walk to the bottom right cor ner Here you will find an old man who will give you the Key of Brilliance. If you don't have Olvan, don't worry In the upper right corner of the continent you will find the North Tower in this tower there is a flashing square. If you step on this square, you will be teleported into the Tower of Grime
- Q. How can I find the cave of Laosu?
- A. From the wilage of Paaal, walk south until you reach the mountains. Now walk west along the mountains and you will enter the cave. The entrance is invisible!
- Q. I defeated the Serpent Lady in the castle of Baran. Prosa, the commander promised me the Moon Rune if I defeated ner. Now when I task to him, he asks me to find Pegim and will not give me the Rune! Why?
- A. Return to the village of Zellis. In the tavern talk with everyone and you will locate Pegim. Now return to Prosa and he will give you the Moon Rune
- Q. I can't seem to find a way through the flames in Bilthem Castle
- A. When you enter the castle, immediately go left and walk up the staircase. Now walk south to the wall and go left Look for a narrow hallway leading up. Take this hallway to the top and go left. Take the staircase down. Now you will enter the fiames from the right hand side. You should find a narrow passage through them
- Q. OK, so I made it through the flames and found Doros, but I can't beat him because he splits into three
- A. Follow the direction above. Except instead of entering the flames, continue walking down until you find a staircase leading down. Here you will find a wooden table. Push the table and you will find a key. To the left of this table you will notice a jail cell. Open the jail cell and release the old man being held prisoner. He will give you an item called: Star. Use this item on Doros and you will be able to defeat him
- Q. I made it to Brush, and Brantu won t let me into the basement. What am I supposed to do?
- A. First you need to have six Runes if you are missing a Rune or Runes read Inrough the top section again and find which one you missed. If you have not missed any, it is likely that an apprentice challenged you to a fight, defeated you and took your Runes. If this has happened, you need to travel from town to town, looking for the apprentice. Once you have six Runes, return to Brush and speak with the fortune teller. Now speak with Brantu and he will fly you to the next continent.
- Q. I am at the next continent and I lost my magic. I have also found Gorfun the main Boss but he disappears, what am I doing wrong?
- A. You need to locate the Moonlight. The Moonlight is located in a cave southwest of Guanta. In this cave you will face Metal Pison. After defeating him you wil locate the Moonlight in a treasure chest. Return to Guanta and someone will remove the curse restoring your magic. When you face Gorfun, use the Moonlight on him when he disappears
- Q. I have received the seven Runes again! Where do I go now?
- A. Walk to the upper right corner of the continent, here you wil find the final castle and Gorsia waits within!

Trimark Pictures has now entered the video game market!

Trimark Pictures has a new video game division headed up by Kelly Flock, Victor S. Mercieca and Gary M. Rosenfeld. They have entered the video game race with two new games, Warlock and Moto X.

Warlock is a game that is based on the very popular movie with the same title. The game contains all manner of beasts and magic spells, plus a lot of intense backgrounds. The animation of both your character and your enemies is first rate, plus it is sure to turn many heads.

Moto X is a game that can best be described with the word FUN! You are a dirt bike racer that is out to win the world circuit. The races are on many different tracks, each with its own reigning champ. After each race, you have the option to upgrade your bike-a very cool feature.

Trimark Interactive has other titles in the works such as one called Evolver that's being released with a movie.

WARLOCK

You are a warlock who has mystic powers. You're able to launch beams of lightning to kill the evil creatures surrounding you!

Along with the power to throw electricity, you have the ability to levitate over the enemies who are in your way. There are other spells, too.

The animation of the enemies in this game is awesome! They really look scary!

Some of this game's levels are underground in a complex series of caverns. Try not to get lost!

The Earth domain consists of two Bosses-a mid-Boss and a final Boss. To defeat them will take a lot of experience in the use of magic spells and wizardry.

I like the unique way of mixing spells in the game—it puts a fresh aspect on an RPG.

The graphics of the enemies, aren't very impressive, and the sound are repetitive after a while.

ickelodeon, the network exclusively for kids, will be releasing a new cart for the Super NES featuring two of their own superstars straight out of TV land-Rocko and Spunky. If you're not familiar with the show, Rocko is your average run-of-the-mill wallaby, living in a world where everything that can go wrong will and does to poor Rocko and his crazy canine pet, Spunky. You begin your adventure at the beach-relaxing, taking a day off from the normal everyday rat race, just you and your loval mutt Spunky. What could go wrong? Believe me, everything! As Spunky attempts to retrieve the frisbee, he wanders off into many dangerous areas filled with traps, pitfalls and even the occasional bad guy from time to time. Your job is to clear the way for your sidekick Spunky so he can make it to the ultimate goal-the golden fire hydrant. Just another dangerous day taken from the diary of Rocko's Modern Life. Good luck, mate!

LEVEL: ICE SCREAM

Guide Spunky through the dangers in the backyards to the four golden hydrants. Use sprinklers, wrenches and other objects to clear the way!

Take a ride on the clouds and find yourself a hidden I-Up.

Use the sprinklers to give Spunky a boost up to the fence.

When Rocko gets into one of his bad moods, he uses three methods of attack. He can either use a High or Low Punch, the Smashing High Kick or the Defensive Tail Sweep.

By picking Spunky up, you can steer him away from any dangers he's heading toward.

Keep an eye out for the red fire hydrants.
They serve as checkpoints for Spanky.

Spunky is a brave mutt, but he definitely does not like water. Watch his meter.

By using certain devices, you can help Spunky move safely throughout the levels.

Each area is loaded with strange and unique everyday items, plus machines that go mad and turn on you and your partner. Sometimes a little thinking goes a long way!

SPUNAL SP

Here are just some of the interesting people and creatures you will meet on your perilous journey. Awesome animation of characters add a sense of realism to the game.

The game follows a distinct story line, backed up with awesome cinemas.

THE COOD

The control takes a while to get used to, and is so hard it can get frustrating at times.

All of Rocko's enemies put together aren't as ugly as Rocko!

Use the wrenches to shut off the valve in the basement.

THE GOOD

How can anyone resist those cute little wabbits? Like Lemmings, the characters make the game!

THE BAD

After a while, it can get redundant. The game needs a few more power-ups or items to liven things up.

THE UGLY

The name...if you think of it in slang... is quite hilarious. It almost sounds like a new doll.

Use your magic to destroy these monsters! Jump to avoid their attacks

f you think you can handle yourself on a basketball court, then Virgin has got the perfect game for you. Some of the best players from around the neighborhood are up for a little one-on one. The big question is-are you? Slade, Chill and Roxy are the three hoopsters who are always chosen for pick-up games around here. You get to control one of the three in an eight-round tournament of one-on-one games with a different game type in each round. You slam against one of the other two players for each game and bet on the games until your wads of cash disappear. If you can outpsych and outscore your way through all eight rounds, you then go up against the court king-Judge in a winnertakes-all game of his choice on his court. And if you don't feel like taking on all that competition, play with a friend to see who's the best. Remember play tough! When you get a chance, JAMMIT!

THE GOOD

Playing in eight different tournaments and the choice of different players sounds good to me.

THE BAD

Some major play control is just begging to be programmed into this cart.

THE UGLY

Having a 6'1" blond throw you to the ground just gives me a flashback of my dating nightmares.

JAMMIT

CHOOSE YOUR WARRIOR

The Judge excels in almost every category. He is a very tough competitor. Move fast and aim every shot to overtake his strength.

Don't let Hoxy fool you! She can take on the best of men She's the best player at slapping long distance shots away from the basket.

Chill is also adept at slapping shots away from the basket. He makes killer slams too. Chill ranks as one of the strongest players ever.

You won't tire Slade out, because he has the best stamina. If you're built for speed, go with Slade. He also has good shooting and dunking skills.

UP CLOSE AND PERSONAL

This is your chance to show off your best moves and to make your opponents look like the chumps they truly are!

FAST-PACED GAME ACTION

Take on the computer on a little one-on-one in eight different tournaments or play with a friend to see who is the best.

THE GOOD

This game has some very impressive game play and the graphics aren't too bad either.

THE BAD

There are too many cheap hits you sometimes have to take in some of the levels.

t is the most treasured substance in the galaxy. It grants extended life, mystical powers and is used in folding space. It is known as Melange, or Spice This spice is only found on one planet: Arrakis, also known as Dune. You assume the role of young Paul Atredies. Your family House has been sent to Arrakis to harvest the Spice by Emperor Shaddam IV. You must send the Emperer shipments of Spice, otherwise you will be thrown out of power or worse vet...terminated.

You start the game searching for Gurney Halleck, a friend who will introduce you to the Fremen (indigenous inhabitants of Dune). The Fremen are your only hope for harvesting the Spice in time for the Emperor. They will show you how to survive the searing desert with special garments called Still Suits. They will also work for you and gather the treasured substance. In time, they will help you in the fight against the Harkonens.

Dune CD is a great RPG. There's a voice for everything and the graphics are spectacular. There are even awesome effects for flying in an Orni! Totally cool.

The intro is full-screen and directly from the movie. The Emperor's daughter is very attractive!

THE BAD

Having to wait through the Orni sequences where you must find hidden Seitches.

THE UGLY

What's with Gurney Halleck? He looks like a mutated Jean-Luc Picard. What a face!

The only way to get to the Fremen seitches is by Ornithopter, Otherwise you'll die.

At first there are only three known seitches to go to. Meet the Fremen ASAP.

The Fremen are your only hope in harvesting the spice in time.

You must convince the Fremen to join you in your cause. Fight or mine spice.

omething unspeakable has happened. A genetic lab has been overwhelmed by the biological monsters it has created. You are a courier who must deliver a package to the scientist who can stop the biological threat from destroying mankind. The only problem is getting to him! Not only are the Neogens (the experiments) on the loose, but the security systems have gone haywire as well. People are trapped and you must somehow find a way to save them.

D/Generation is an action game where you must travel from the 80th floor on up to where the scientist is. Not only are fast reflexes required, but puzzle solving skills are critical if you want to succeed. You must try to find the way to open certain doors plus locate keys, grenades and the laser pulse-gun. Can you save the human race from the deadly D/Generation?

THE DERRICA FILE

NAME: Jean-Paul Derrica BIRTHDATE: MARCH 24, 1971

PERSONAL HISTORY:

Jean-Paul Derrica was brought aboard as head of the Genog genetics project in their Biolabs stationed in Singapore. His latest project in a series of four is the D Generation. It is supposedly an advanced stage of artificial evolution, capable of neuro-holographic camouflaging and wearing a hide impervious to all known weapons. It was upon this project that Jean-Paul Derrica disappeared and the Singapore Biolab fell into dismay. His last message was an urgent call for the package that you now carry. Derrica's lab is on the 90th floor. Hopefully he will be alive to accept the package.

NEOGENS

Neogens are genetically engineered organisms. There are four types.

A GENERATION

The A Generation specimen is a red blob that absorbs its victim then explodes, It's the most common Neogen.

B GENERATION

Resembling a malevolent slinky, this blue Neogen likes to pulp humans with its body. Very fast and deadly.

C GENERATION

This Generation can transform into almost anything, and it decapitates its prey. Use caution with these.

D GENERATION

Top secret prototype. Unknown capabilities, singular in nature. All information on the subject is confidential.

ROOM FOUR

Room Four contains three important things. The first is one of the senior members of the Genog Board. He will offer some important information. Then you can find a laser in the upper left-hand corner. A security level key is also found here. Use caution with the Tracker. You don't want the person to be killed.

FLOOR ONE: GENOO BIOLABS

To elevate yourself up from the 80th floor to the 90th, you must work your way to tube-like teleporters. The teleporters are only capable of raising you up one floor at a time. These should be found at all costs! There is one in the back room.

ROOM NINE

There's quite a devious trap in this room. A key is placed in a dead end. with Electric Plates sizzling on and off. You must figure out which switch opens up the door to freedom.

your shots off of walls and objects. A good strategy to use from a distance. It keeps unu safe.

ROOM SEVEN

This somewhat hidden room contains a hand grenade. It is worth finding. Watch the Tracker.

This is the type of game that takes time to get into the story. It's gloomy—just the way I like things.

The control isn't as refined as I would like. Dodging the plasma thingles gets way too tough.

Call me mad, but don't you think that being absorbed by a pulsating blob is a little bit weird?

SURVIVING THE **NEOGENS...**

Intelligence reports indicate that the Neogens have escaped from their stasis fields via the ventilation ducts. To properly rid yourself of these critters, close every duct you see. This should shut them off from the rooms.

VENTILATION DUCTS

ROOM THREE You'll find a secretary

cowering behind a desk. She'll tell you a bit about what's going on in the building. Read the computer screen for even more info. Try shutting down the Tracker too!

Unlike most polygon games currently out on the market, this title has a full 360 degree landscape filled with mountains, buildings and other terrain that you have full mobility to fly through, not just a straight-on course slightly veering to the left and right. This is one of the first training planets. Get used to the Tgriffon's capabilities as well as the controls. The landscape structure is diverse enough and the buildings are in small numbers.

Watch out near factories; several kamakazi enemies are waiting near!

This world is a treacherous one, harboring such terrors as giant sandworms! There are also vortexers dotted about the planet, leading to hidden areas that you cannot normally reach!

This land is quite hilly, so take your time and search carefully.

This level is set up somewhat like a maze. You must navigate through the valleys in search of remote lone pods. Don't speed through here, or you might just become part of the mountain structures.

This level twists and bends to lead to many different routes! Very cool!

This level will come much later on in the game. In here, faces will fire missiles at you when close and force fields will obstruct your path if you do not take out the generator beforehand!

These guys are bad news should you get near them! They really do hurt!

Should you enter a big dark blue ring, you will be treated to a bonus world when the level is completed. The object here is to grab as many power-ups as you can and exit before the time runs out!

The water section of this level is pretty tricky. Maneuver carefully.

Level 2 is also easy. After you pass the level, ride in a ship and fight a Boss with bullets. Beat him and move on.

Here you see our hero picking his toes. Watch out for the snails!

Hooray for the End of the Cold War

Virtual Reality for the masses moved a step closer when San Diego-based GreyStone Technologies demonstrated their Pteranodon Ride at COMDEX, held in mid-November in Las Vegas.

According to GreyStone, the demo used some of the most advanced real-time computer generated imagery ever displayed,

and was based on GrevStone's proprietary real-time interactive VR technology, Angel Studios' world visual database textures, and Silicon Graphics' Onyx graphics super computer.

Initially involved exclusively in designing specialized software used in military aircraft and sophisticated air combat simulators, GreyStone has effectively 'beaten their swords into plowshares" by transferring its cutting edge technology into a family of entertainment software that includes Auto Baron. Cyber Chess and Labyrinth Rangers.

Maybe Batman Isn't So Tough After All Michael Keaton, a.k.a. Batman, used to be a Mister Rogers' Neighborhood staff member. He did everything from puppeteering, to running the train and even occasionally popped on camera in small roles.

EA Sports Cards Could Be a Hit

t may be the start of something big. Then again, it may be a flash in the pan. But a new card set from EA Sports, that's right. Electronic Arts, has us

intrigued. The Official NHL '94 Game Card Set is comprised of 225 cards designed to complement the EA Sports

video game. It's the first time we can remember a deluxe full-sized card set made specifically for that purpose.

If you're not familiar with the game, each on-screen character is based on a real hockey player. Key attributes such as speed,

strength, checking, agility and stamina are based on their real life counterparts and are taken into account in depicting the video game skaters.

The front of the cards feature an action picture of the player while the back provides traditional background info on the player that is normally found on regular sports cards.

What makes the back of the cards unique is the varexample. Vancouver's Pavel Bure is a fast skater with a hard shot. Those attributes can be readily found on the back of his

card

For that reason, this card set is more than, well. a card set. It's actually a little database of information that also provides an extra element of realism to their already great games by providing an action photo of each character depicted in the game.

Furthermore, there are also special

designer tip cards that give insights from the guys who designed the game!

From the slick packaging to the useful information, EA did a nice job with this set. Hopefully it sets a precedent that other game companies will follow.

Then again, a Mortal Kombat or Street Fighter II card set featuring the same type of information with some cool original artwork on the fronts probably wouldn't sell...NOT!!!

By the way, where's the Madden set?

Midwest Street Fighter II Tourney

Another sign of the times is the video game tournaments that seem to be popping up everywhere. Although such tournaments have already received major event status in Japan. they're just starting to pick up steam in the U.S.

One upcoming event is The Midwest Super Street Fighter II Tournament, which is being held March 26 at 3pm at Super Just Games in Northbrook, IL.

Rules for the contest include:

· A \$5 entry fee for all

 The tournament will be set as double elimination. All contestants will start in the winner bracket. If a player loses the match. he/she gets moved to the losers bracket.

 Plav will consist of two out of three matches: semifinalists will play three out of five matches and finalists will play best of seven matches.

Image Comics Continues to Evolve

he comic book industry enjoyed its best year ever in 1993. But with such rapid growth, comes change. And no single company better reflected the changing face of the comic industry than Image.

In the latest news from Image, Jim Lee is launching a new sub-imprint within the Image Comics line entitled Wildstorm Productions will market and oversee production and creative development of all of Jim Lee's titles currently trademarked under Aegis Entertainment, Inc.

"During the startup of Image Comics, I incorporated my business activities under the name Aegis Entertainment. As Aegis grew and the marketplace changed, I decided a new name would more accurately define the nature of the titles we produce and my commitment to the retailers and fans to create the very best comics possible. The Wildstorm Productions name and logo will quickly identify all products from my studio," Lee said.

In conjunction with the new name, the studio has made some changes to ensure timely shipping of titles. Former DC editor Bill Kaplan has been brought on board to oversee production and scheduling of books, while computer artists Ben Fernandez and Joe Dunn have joined the staff to allow greater quality control and faster turnaround of separations.

Ninjak Hits #1 Spot for Valiant

Up and coming comic book publisher Valiant Comics got some good news when its book, Ninjak #1 hit, number one for November according to market reports from Capital City, Diamond and Heroes World. It's

not a surprise-the book really does stand out above the crowd. This marks the first time that Valiant has published a month's #1 book.

"Frankly, I'm thrilled to have had the opportunity to work on a

#1 book," said series writer Mark Moretti. "Joe Quesada and Jimmy Palmiotti did a terrific job on it. The story I wrote was solid, but they certainly put a lot of drama into the rendering of it. When I found out we had made it to #1, I was a very happy sort of shocked."

Massarsky said, "This is exactly what we're trying to do here at Valiant."

"I think the cover enhancement really juiced the sell-through," said jon Hartz, Valiant's senior VP, who offered some of the

Aliens vs. Predator: Lost in Space?

With the announcement of Alien 4, the long awaited crossover is back on hold

Aliens film, it was a
bittersweet announcement

on one hand, genre fans now have another big budget sci-fi flick to look forward to. On the other, however, it casts serious doubts

on the prospect of a crossover film and puts the idea back into a black hole.

"Obviously it's disappointing," said Dark Horse Entertainment's Greg Lassen, who's a key figure in the development of other Dark Horse titles into feature films including The Mask starring Jim Carey and TimeCop. starring lean-Claude Van Damme, "Aliens vs. Predator is a cool concept that works well in the comic. It would be great as a movie." Dark Horse's

Aliens vs. Predator comic has consistently been one of their best-sellers. In fact, the strong concept and story lines in the series have propelled rumors about a cinematic crossover since the book's inception in 1989. "The pairing was such a natural one," said Dark Horse executive editor Randy Stradley. "It was a wonder it hadn't been the first character vs. character idea to occur to us."

Four years later, it's evident what a major coup Dark Horse pulled off in getting Fox to agree to do the comic. Development of the feature film never got beyond a few possible scripts, and the dismal showing of Alien 3 at the box office nearly killed a franchise that James Cameron elevated almost single-handedly.

One of the hottest rumors for an Allens/Predator crossover came from screenwriter Pete Briggs, who was rumored to have delivered a finished script to Fox in 1991. Briggs felt that if a decent crossover film was produced, new life Josh Whedon, 29, who formerly was a writer on Roseanne and also penned Buffy the Vampire Slayer, is being tapped for the project.

No story line has been set, but the basic premise of Allen 4 will be a continuation of the story line set forth in the first three pics.

would be injected into both franchises that nearly everyone felt had been jeopardized by the strange directions taken in Alien 3. Many felt that Fox would then have the luxury of continuing both series indefinitely, either together or independently.

In spite of Brigg's vision and Dark Horse's success with the comic, the Aliens vs. Predator movie script has been put in mothballs. That doesn't mean the film will never happen, but you probably won't see it before the turn of the century.

In the meantime, Fox is revving up production on the Alien 4 script.

In the second film, a milltary team was sent to rid the planet of the aliens.

Alien 3 was set on a desolate penal colony with the series' main character infected with the Allen menace. All three films set up possible story lines for Alien 4, although many felt that the elimination of both Newt and Hicks, supporting characters from the second movie, was unnecessary and eliminated a possible successor to Sigourney Weaver's Ripley character.

According to details from Fox, which can be described as sketchy at best, one plot first three films together, it's no surprise that Fox is wooing her to reprise her role as Ripley.

Some would like to see Weaver return, hopeful to see the third episode be nothing more than a bad dream, while others want to see a new story with a fresh start.

That in itself is a tricky proposition, as Ripley was killed in the last film. But undoubtedly, Fox will figure out a way to explain the reincarnation, as the Dark Horse comics make it clear there are too many cool stories left untold about the extraterrestrial warriors.

Konami

Extra Speed Setting

Enter the Konami code at the Title Screen on controller 2: UP, UP, DOWN, DOWN, LEFT, RIGHT, LEFT, RIGHT, B, A.

Hey! Are you tired of the two speeds that are available in TMNT: Tournament Fighters for the Super NES? Well, with this code you can add on a third speed to the menu in the Options Screen! To do this, enter that all too familiar Konami code with controller 2. At the Title Screen, (using the second

controller) enter this code as follows: UP. UP. DOWN. DOWN. LEFT. RIGHT. LEFT. RIGHT, B. A. You will then hear Aska's voice. Now, bring up the Options Screen and set it

to the third

a fast fight!

speed for

Enter the code correctly and you will hear Aska's victory word.

Go to the GAME SPEED option and you have a new faster speed!

Cyber Shredder dashes at Donatello and takes him head-on!

Aska teaches Wingnut a lesson in the way to quickly do a Whirlwind!

Leonardo hits Mike with his Endless Screw faster than he can blink!

Wingnut and Mike battle it out-and completely miss each other!

The faster speed even works in the game's Story Mode!

Don't fight too fast-you may Double KO each other!

After getting slammed by the Dream Team in hoops,

31 soccer-playing countries want to kick our butts 'til we're' Red, White and Blue. So gear up for the '94 World Cup with the world-class play of AWS

Pro Moves Soccer. Full-contact, professional action. Teams based on actual Cup records. And ten special Pro Moves, for the ultimate in realism and control.

Brutal slide tackles. No-look passes. Precision high kicks.

bicycle kicks. Even illegal holds—and refs ready to bench you, if they see it. For even better control —one-Pro-Move-per-button—

get one of the new six-button controllers like the asciiPad SG-6 or Fighter Stick SG-8*. Or, build up your team by luring top players with astronomical salaries. Astronomical salaries? Like we said, it's a wonder we didn't invent it here, first.

RETROMAGS

Our goal is to preserve classic video game magazines so that they are not lost permanently.

People interested in helping out in any capacity.
